

The European Qualification Framework

frequently asked questions

What is the European Qualifications Framework (EQF)?

The European Qualifications Framework (EQF) acts as a translation device to make national qualifications more readable across Europe, promoting workers' and learners' mobility between countries and facilitating their lifelong learning.

This will help learners and workers who are moving between countries, from job to job and from one education or training institution to another.

The aims of the EQF are to help develop a European-wide workforce that is mobile and flexible, and to aid lifelong learning.

What is the scope of the EQF?

The EQF will relate different countries' national qualifications systems to a common European reference framework. Individuals and employers will be able to use the EQF to better understand and compare the qualifications levels of different countries and different education and training systems.

What is the purpose of the EFRS EQF level 6 and 7 docs for radiographers?

The purpose of the document is to serve as a benchmark;

- informing readers about what the EFRS membership agreed to be the entrée level to the radiography profession in Europe and
- as a point of reference for use by professional bodies, educational institutions, employers and other relevant bodies throughout Europe.
